This guide describes the points on the Tualatin River that are currently accessible to the public. The guide starts at the mouth of the Tualatin and works its way upstream, describing access points and some of the hazards along the river. Each site location is described in the listing of the river mile (RM) and by which side of the river it sits on as you face downstream. LB stands for the left bank, RB for the right bank. River mile markers have been placed along the Tualatin by the Tualatin Riverkeepers and other volunteers. RM 0.0 is at the mouth of the Tualatin where it joins the Willamette River.

Much of the Tualatin River runs through private property. Currently there are no campsites on the lower Tualatin River. Please do not trespass on private property or on the Tualatin River National Wildlife Refuge. We also ask that you pack your litter out with you. Trash cans and restrooms are located along the river at Willamette Park, Brown's Ferry Park, Tualatin Community Park, Jurgens Park and Rood Bridge Park.

Tualatin Riverkeepers is working with local governments to increase public access to the river. The Paddler's Access Guide to the Lower Tualatin River is produced and published by the:

METRO REGIONAL PARKS AND GREENSPACES: Providing more public access to the Tualatin River was one of the goals of Metro's \$136 million open spaces bond measure, approved by voters in 1995. Metro has acquired more than 860 acres of natural area with nearly six miles of river frontage along the Tualatin River, including five potential access points for paddlers. More than 8,000 acres of valuable natural areas have been saved by this landmark conservation effort, protecting water quality and fish and wildlife habitat and ensuring access to nature for future generations. For more information call 503-797-1850 or visit www.metro-region.org/parks.
